

OUR CABINETS: Fully custom, made to order with regards to design, species, size, and finish. Cabinets are designed around site dimensions and appliance specs - ensuring the best use of space while minimizing the need for fillers. Our design and manufacturing software is fully integrated into our production process, allowing for a seamless build from start to finish. We provide shop drawings and 3D renderings (your design or ours), and our cabinet packages include all cabinet trim (crown, base, toe kick, light rail, etc).

CONSTRUCTION: All joints are interlocked and secured, using traditional wood working adhesives and mechanical fasteners.

CASE PARTS: All cabinet boxes (sides, backs, tops and bottoms) are made from prefinished veneer core plywood, cut to size and dadoed using CNC router technology.

FRAMES: Face frames are made from solid hardwood, glued and mechanically fastened to dadoed case parts. Frames are 13/16" thick and are available in a variety of sizes and species. Inset and beaded inset face frames are also available.

DRAWER BOXES AND ROLL-OUTS: 5/8" solid maple hardwood, dovetailed on all four corners. 3/8" thick birch bottom. Drawer boxes are finished after assembly and drawer fronts are attached to the drawer box with screws.

DRAWER SLIDE: Blum 100lb capacity, concealed under mount, full extension slides with integrated Blumotion.

DOORS: Traditional Mortise and Tenon joints with panel assembly that allows for the natural expansion and contraction of wood. Doors are available in a variety of hardwoods or MDF with numerous panel options.

HINGES: Traditional 5/8" overlay European style hinges with integrated Blumotion. Non-standard and specialty hinges also available.

END PANELS: Exposed cabinet ends are built as frame & panel to match doors and drawers (standard). Sheer ends are also available.

SHELVES: Adjustable and fixed shelves are made of 3/4" veneer core plywood, and edge banded on front.

FINISH: Automated flatline spray system with integrated drying tunnel applies solid color, stain, and clear coat finishes-ensuring a consistent, quality finish. Glaze, rub through, and sanding between each coat is performed by hand.

OPTIONS: Cabinets are fully custom, and made to order. Please inquire about options that may not be listed.

OVERALL: We know you have choices when it comes to your custom cabinets. Our cabinets are not sold at "big box" stores or other retailers, and are not available "off the shelf". Make an appointment with us at our showroom, where our cabinets speak for themselves.
